

CERTIFICATE OF ANALYSIS

M O N A • V I E

MonaVie Active Juice was tested by Informed-Choice/HFL. Test results confirm MonaVie Active is free of banned substances. MonaVie has entered into a collaborative relationship with Informed-Choice/HFL as part of our ongoing efforts to ensure MonaVie products can be safely consumed by professional and collegiate athletes as well as the sports-minded consumer. Informed-Choice/HFL tests supplements against the WADA prohibited substance list.

BELOW ARE A LIST OF THE COMPOUNDS WHICH MONAVIE ACTIVE JUICE WAS SCREENED FOR:

GCMS Reporting Level of 10ng/g

GCMS Method Capability of 10ng/g

LCMS Reporting Level of 100ng/g

LCMS Method of Capability of 10ng/g

LCMS method of Capability of 100ng/g

None of the above compounds were present in MonaVie Active. All samples tested in accordance with HFL screening methods. Many teams and leagues (professional, collegiate and Olympic) accept Informed-Choice/HFL tested supplements.
